Key Skills Snapshot

Full-Stack Development: React.js, Next.js, TypeScript, Node.js, Express.js, RESTful APIs, JWT, Sequelize, MongoDB, Redis Cache

DevOps Cloud Native: Kubernetes (CKA, CKAD, KCNA, KCSA), Docker, AWS (EC2, Microservices, Ingress Controller), CI/CD Principles

Programming Languages: TypeScript, JavaScript, HTML, CSS

UI/UX Styling: Tailwind CSS, Custom React Hooks, Responsive Design

Profile Summary

Results-driven Full-Stack SDE with expertise in **React.js, Node.js, and DevOps (Kubernetes, Docker, AWS)**. Proven record delivering scalable, cloud-native solutions, optimizing systems, and fostering cross-functional collaboration. Certified Kubernetes professional. Eager to contribute immediately.

Work Experience

• Software Developer

Livlong365

July 2023 – Present

Pune, India

- Spearheaded development of scalable frontend applications using **React.js, Next.js, and TypeScript**, significantly enhancing user experience and engagement by improving load times by 15%.
- Architected and optimized high-performance **Node.js** and **Express.js** backend services, ensuring robust data handling and responsiveness across the platform, handling over 10K requests/min.
- Drove end-to-end ownership of the development lifecycle, from strategic planning to successful deployment of critical features, consistently delivering on tight deadlines, often 1-2 days ahead of schedule.
- Orchestrated containerization and deployment with **Docker** and **Kubernetes**, improving deployment cycles by 25% and enhancing system scalability by supporting a 30% increase in user base.
- Pioneered design and deployment of robust microservices architecture, leading to improved system maintainability and scalability for future growth and increased traffic volumes.
- Cultivated cross-functional collaboration with product and design teams, ensuring project alignment and accelerated delivery of integrated solutions, reducing integration time by 10%.

Tech Stack: *React.js — Next.js — TypeScript — Node.js — Express.js — Docker — Kubernetes*

• Backend Developer (Internship)

Idea Usher

November 2022 – April 2023

Pune, India

- Owned the backend development lifecycle, successfully executing tasks from initial design to final deployment, ensuring robust and reliable system functionality with 99.9% uptime.
- Engineered and optimized RESTful APIs using **Node.js, Express.js, and TypeScript**, ensuring seamless and secure data communication for critical application features.
- Optimized database performance by designing and managing **MongoDB** schemas, queries and indexing; implemented **Redis** caching to reduce database load and improve response times by 20% for key operations.
- Secured applications by integrating comprehensive authentication and authorization mechanisms, significantly enhancing application security and scalability to handle increased user loads by 25%.
- Partnered with cross-functional teams to deliver efficient and reliable backend solutions that met business objectives, contributing to a 15% improvement in project delivery efficiency.

Tech Stack: *Node.js — Express.js — MongoDB — TypeScript — Redis*

• Software Developer (Internship)

Conglem.ai

August 2022 – October 2022

Pune, India

- Built and scaled **React.js & Next.js** applications with **TypeScript**, delivering seamless user experiences and enhanced interactivity for a user base of 500+ daily active users.
- Crafted modern, responsive UIs using **Tailwind CSS**, enhancing visual appeal and adaptability across various devices and screen sizes, improving UI consistency by 20%.
- Boosted application performance through efficient API interactions and rendering techniques, resulting in faster load times and smoother user navigation.
- Improved code efficiency and reusability by creating reusable frontend components, reducing development time for new features by 15%.
- Collaborated intrinsically with backend engineers and designers, ensuring smooth integration and cohesive product development from concept to deployment.

Tech Stack: *React.js — Next.js — TypeScript — Tailwind CSS*

• Craft-UI

September 2024 [View Project](#)

- **Led the design and development** of **Craft-UI**, a full-stack project inspired by ShadCN UI for building modern UI components, **demonstrating expertise in contemporary web development practices and scalable architecture.**
- **Front-end engineered** using **React, Remix, Tailwind CSS, custom React hooks, and TypeScript**, ensuring a seamless developer experience and highly performant user interfaces, achieving a **Lighthouse score of 90+.**
- **Developed robust backend infrastructure** with **Node.js, Express.js, Sequelize, and TypeScript**, implementing robust **JWT-based authentication** for secure access, **handling user data with integrity and processing over 100 authenticated requests per day without errors.**
- **Orchestrated deployment** of the application on **AWS EC2** using **Docker and Kubernetes**, achieving **scalable and efficient container orchestration capable of handling increased loads by 50% with zero downtime.**
- **Prioritized scalability and performance** through API design, **significantly streamlining UI development workflows and reducing boilerplate code by 20%.**
- **Ensured efficient state management** and optimized rendering to enhance application performance, **contributing to a fluid and responsive user experience across diverse devices.**

Tech Stack: *React — Remix — Tailwind CSS — TypeScript — Custom React Hooks — Node.js — Express.js — Sequelize — JWT Authentication — Docker — Kubernetes — AWS*

• AWS-Powered Cloud-Native 3-Tier Application Deployment on Kubernetes

January 2025 [View Project](#)

- **Designed and deployed** a highly scalable and resilient 3-tier application on **AWS** utilizing **Kubernetes**, **showcasing advanced cloud infrastructure deployment skills and achieving 99.95% availability over 6 months.**
- **Streamlined deployment** by containerizing services using **Docker** and hosting the **Kubernetes** cluster on **AWS EC2**, **optimizing resource utilization and ensuring cost-effectiveness by 20% compared to traditional VM deployments.**
- **Facilitated seamless microservice communication** within the cluster, **ensuring robust request handling and fault tolerance for critical business processes, supporting over 10 microservices.**
- **Implemented Ingress Controller** to securely manage external traffic and expose services to the public, **enhancing security posture and accessibility, handling peak traffic of 500 requests/sec with low latency.**
- **Guaranteed high availability, fault tolerance, and optimized performance** through best-in-class cloud deployment practices, **leading to a reliable and efficient application environment for mission-critical operations.**

Tech Stack: *AWS — Docker — Kubernetes — EC2 — Ingress Controller — Microservices — Cloud Deployment*

Education

• B.Tech in Electronics and Telecommunication

Vishwakarma Institute of Technology

June 2019 – June 2023

Pune, India — 8.6 CGPA

• Science - 12th

Sadashivrao Mane Vidyalyay

June 2017 – June 2019

Akluj, India — 87.54%

• SSC (10th)

Maharshi Shankarrao Mohite Prashala

June 2016 – June 2017

Yashwantnagar, India — 91.80%

Certifications

• Certified Kubernetes Application Developer (CKAD)

Scored - 80% (Verify Credential)

- **Expertise** in designing, deploying, and managing cloud-native applications on Kubernetes.
- Proficient in Pods, Deployments, ConfigMaps, Secrets, Networking, and Persistent Storage.
- Hands-on with **kubectl**, **Helm**, and YAML manifests for efficient workload management.

• Certified Kubernetes Administrator (CKA)

Scored - 81% (Verify Credential)

- **Expertise** in Kubernetes administration, troubleshooting, and security for production environments.
- Proficient in deployments, networking, storage, and RBAC, ensuring system reliability.
- Hands-on with **kubectl**, **kubeadm**, **Helm**, and monitoring tools for efficient cluster operations.

• Kubernetes and Cloud Native Associate (KCNA)

Scored - 95% (Verify Credential)

- Demonstrated foundational knowledge of Kubernetes, cloud-native architectures, and containers.
- Proficient in Kubernetes fundamentals, cloud-native security, networking, and observability.
- Strong understanding of **CNCF projects**, containerization, and microservices principles.

• Kubernetes and Cloud Native Security Associate (KCSA)

(Verify Credential)

- Earned the KCSA certification, demonstrating foundational expertise in Kubernetes and cloud-native security practices.
- Gained hands-on experience with securing containers, managing **RBAC**, enforcing network policies, and handling secrets in Kubernetes environments.
- Learned to identify threats, secure the software supply chain, and apply best practices for workload and runtime security in cloud-native deployments.

Award

• Best Performer Award

Livlong

- Recognized for **exceptional contributions**, **technical excellence**, and unwavering commitment to delivering high-impact solutions.
- Demonstrated strong problem-solving skills, a proactive **ownership mindset**, and exemplary cross-team collaboration.
- Consistently delivered high-quality work, ensuring efficiency, scalability, and innovation in all projects.
